INFORMATION FOR APPLICANT			
16	Brief Description of Assignment	<p>According to RHD Database, total numbers of intersections among National and Regional Highways and Zilla Roads is 752. Many of the side roads of National and Regional Highways have lower formation level than the main corridor, which create level differences among the roads. This level difference is responsible for sight obstruction. Because of this sight obstruction direct collision occurs between the side road vehicle and the main road vehicle. Untreated junctions of National and Regional Highways are also creating huge traffic jam on main corridors.</p> <p>The consultant will investigate all the intersections among National, Regional and Zilla Highways to find out the safety hazards related to each and every intersection.</p> <p>After the study the consultant will provide report</p>	

		consisting list of identified hazardous Major-Major & Major-Minor intersections with detailed engineering design and drawings of short term & long term countermeasures. Detailed cost estimate and project appraisal/feasibility report for implementation of the countermeasures will also be provided by the Consultant firm.
17	Experience, Resources and Delivery capacity required	<ul style="list-style-type: none"> Interested Consultancy firms must provide information indicating that they are qualified to perform the services (brochures, description of similar assignments, experience in similar conditions, availability of appropriate skills among staff etc).
